

PRINTABLE EMBROIDERY MACHINE

ABSTRACT

A printable embroidery machine (1), including a machine body (2) capable of sewing a workpiece cloth (W), a cloth holding frame (3) holding the workpiece cloth (W) to be sewn, and a frame drive unit (4) having a mounting part (4a) detachably attached to the machine body (2), and coupled to the cloth holding frame (3) to independently move the cloth holding frame in two horizontal directions perpendicular to each other. An ink-jet type printer (5) is detachably attached to the mounting part (4a) of the frame drive unit (4) separated from the machine body (2). The workpiece cloth (W) on the cloth holding frame (3) moved by the frame drive unit (4) can be printed by the printer (5).
